01 Stool

This seat is always on the go: free-wheeling casters allow the versatile stool to be quickly put in place or pushed aside. The opening along the seat serves as a grip hole and whiteboard holder at the same time. The extended metal frame makes it possible to simultaneously insert a whiteboard on each side just above the casters.

02 Whiteboard-Connectors

Handy plug-in connectors join the whiteboards to create a screen of boards or a booth you can write all over. These large creative surfaces divide the room and provide both privacy and sound insulation.

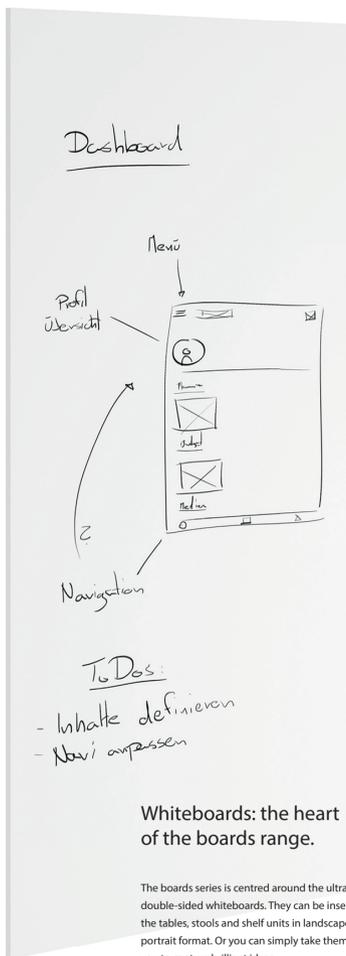

09 Starter-Kit

The starter kit is the perfect introduction to the world of agile working. The portable table holds 8 whiteboards, 4 nate 5 bar stools, 4 boards stools, a mountable tray and a set of 6 whiteboard connectors. Once assembled, the set provides a basic configuration for various workshop spaces and scenarios.

03 Standing table

The mobile standing table provides the foundation for agile project work. Loops in orange or black identify the clever pull-outs for placing the whiteboards in landscape format. The punched metal base provides additional storage space and turns the table into a convenient transport trolley. For stools, work materials and up to eight securely stacked whiteboards.

Whiteboards: the heart of the boards range.

The boards series is centred around the ultra-light, double-sided whiteboards. They can be inserted in the tables, stools and shelf units in landscape or portrait format. Or you can simply take them with you to capture brilliant ideas.

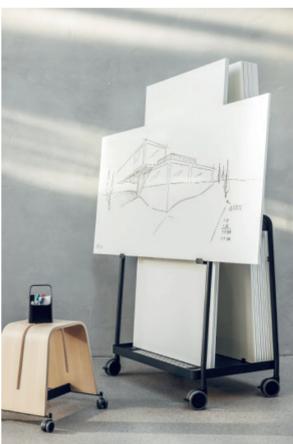

08 Accessories

Optional gadgets such as toolboxes, a mountable tray and useful hooks – e.g. for an electrical strip with practical loops – keep everything you need on hand.

04 Work desk

The work desk impresses as a presentation stand or lectern. The pull-out shelf allows whiteboards to be placed in landscape format. In addition, whiteboards can simply be inserted in the stylishly extended frame in portrait format.

07 Storage trolley

The storage trolley with its rails at the bottom allows to organize and hold up to 16 whiteboards. Metal tabs on both sides of the frame secure items in place during transportation, while also facilitating the placement of whiteboards in landscape format.

06 Rail system

The series double rail system can be mounted individually on the wall or on the frame of the shelf unit. The rails are tailored to the size of two whiteboards and can be expanded with any number of additional wall rails.

05 Shelf

Everything is within easy reach here – on the mobile boards shelf unit: its three shelves and the punched metal base provide lots of space for everything that makes working life more efficient and effective. The middle shelf can be pulled out to transform the frame into an easel for whiteboards in landscape format. An optional rail system can be mounted on the frame to accommodate even more ultra-light whiteboards.

CREATE NEW SPACES WITH BOARDS

How agile office work looks like.

CREATIVE SPACE

Shelf units, tables and stools that can be combined in any number of ways not only provide creative surfaces but also versatile seating and workspaces. Ideal for creative workshops and agile project work.

MEETING SPACE

With connectors, whiteboards can be set up as a room divider to create separate meeting areas.

TEAM SPACE

In combination with bar stools, the standing table forms the central hub for collaboration and agile project work.

PRESENTATION SPACE

Individually mountable rails turn whiteboards into a canvas. The stool arrangement reflects a conventional presentation layout.

What will your office of the future look like? Get creative and discover our complete boards collection.
