01

Product idea.

# On top of the world with crona.

- Visually impressive, lightweight bar stools: models in two different seat heights
- Dynamic lines of the crona family for diverse combinations within the collection
- Seven harmonious colours allow incredible freedom of design
- Wooden frame: homely four-legged construction in oak or beech in various stains
- Chromed frame and foot-rest with an optional coating that matches the seat shell
- Easy to clean and disinfect
- Versatile and adaptable, from cafeterias to restaurants

# Visually impressive and lightweight bar stools.

With its identical design language, crona light bar has not only raised the height of the seats within the crona range but has also become a benchmark for barstools. The best features for the gastronomy and bar sectors make it stand out.

Whether chromed or colour laminated – crona light bar is easy to care for, hygienic and robust. And, in the wooden frame version, exceptionally comfortable.

# Standing tall with the stacking factor.

We are not joking when we say that this chair can be stacked five high, but you're riding high when you sit on it – and very comfortably, too!

With crona light bar, you can choose between a sled-base frame and a four-legged frame. Its possible uses are just as varied, from cafeterias to restaurants.

**Featuring a sled-base frame:**  
up to 5 chairs can be stacked.

# On top of the world on two levels.

In addition to the standard bar stool height (77 cm), crona light bar is now also available in an agile height of 64 cm for sitting or standing. Ideal for co-working spaces, breakfast bars, stylish information desks or simply in your workplace or office at home.

All three frame types are available for the medium and high version.

**Sit or stand at a height of 64 cm:**  
incorporating a new, dynamic  
seating solution.
